

Kronos Workforce TeleStaff/ Workforce Timekeeper Interface

The Interface That Does the Work for You

Now you can share data and streamline processes quickly, easily, and seamlessly through one integrated solution. The Kronos® Workforce TeleStaff™/ Workforce Timekeeper™ interface enables you to extend the benefits of workforce management to your entire organization, including public safety, through one integrated solution. This interface simplifies the exchange of personnel, scheduling, timekeeping, and time-off information to easily unify systems, saving your IT department significant time and effort. The result: a streamlined workflow that reduces errors and decreases the waiting time for access to information.

How does it work?

The Workforce TeleStaff/Workforce Timekeeper interface works with two tools: the Kronos Workforce TeleStaff Gateway Manager and the Workforce Integration Manager™. These tools extract data from their respective systems. The interface uses predefined templates to make easy work of pulling specific scheduling, timekeeping, and personnel data — saving your IT staff the work.

Key Benefits

- » **CONNECT SOLUTIONS** and gain a streamlined workflow
- » **ELIMINATE** repetitive and overlapping work processes to increase accuracy
- » **REDUCE ERRORS** with automated, simple exporting of information
- » **ACCESS INFORMATION** quickly and easily with connected solutions
